LACK OF UNITY

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, Claim(s) 1-6 and 26, drawn to a method of separating an/or quantifying a target nucleic acid molecule or an object which utilizes a first magnetically responsive bead and a second magnetically non-responsive bead, classified in Class 435, subclass 6 and 7.1.

Group II, Claim(s) 7-13, drawn to a method quantifying a desired protein in a sample which does not require the use of a first magnetically responsive bead and a second magnetically non-responsive bead, classified in Class 435, subclass 7.1 .

Group III, Claim(s) 14-25, drawn to a method of quantifying a target nucleic acid in a sample which does not require the use of a first magnetically responsive bead and a second magnetically non-responsive bead, classified in Class 435, subclass 6.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature(s).

Claims 1-6 are related in that they require the use of a first magnetically responsive bead and a second magnetically non-responsive bead (i.e. the special technical feature) which Claims 7-26 do not require, therefore, claims 1-26 are not linked by a special technical feature. Without the special technical feature the claims lack unity.

Art Unit: 1634

4. The examiner placed a telephone call to the applicant's representative on 20 NOV 03 regarding an oral election to the above restriction requirement, but did not result in an election. The applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ethan Whisenant, Ph.D. whose telephone number is (703) 308-6567.
